Artist's statement

Katerina has a great talent to build her own unique world. Her world is full of sincere emotions, which are simple and complex at the same time. It's a world full of harmony, beauty, femininity and a bit of sentimental sadness.

For her, it makes no difference which equipment is used to create an artwork. What really matters is the result that comes from the heart and doesn't leave people indifferent. She wants her art to reach the viewers' deepest feelings and emotions.

Katerina's first models were her children and friends. Nowadays she works a lot with professional models. The main criteria for choosing models are their natural body language and an expressive face, especially the eyes which are "the mirror to the soul".

In her artworks she wants to show not only the external beauty, but also something from the depths of human nature.

She evolves with every new work. She lives, thinks and feels together with her creations.
